info:

Special mention: "MADE IN GERMANY" by curry production (Germany 2002). The Jury wants to give a special mention to a film, which convinces particularly by its straightforward, consequent and at the same time humorous and entertaining realisation. The film deals with the question, what a country – in this case Germany – would be without imports or influences of other countries and cultures. In a time, in which right winged and neofascist organizations seem to gain more influence again, the film uses intelligent humour to show the absurdity and stupidity of racist ideologies. A special mention of the jury goes to "MADE IN GERMANY". (Aege festival 2005)
